- 8. Partners & Community**

# LUMANAGI PITCH STATEMENT

Lumanagi is an automated market-making (AMM) decentralized (DEX) crypto swap (blockchain exchange) that focuses on the crypto adoption of the Eastern-European region, with its unique bridges and other features. It has its unique governance token called Lumanagi (LMNG) that entitles the community to vote and other rights. The platform's main mission is to allow secure, and cheap swapping among its community.

# DEX MAIN FUNCTIONS

- 1. Swap:** Users are able to exchange listed tokens on the swap for a low fee.
- 2. Provide liquidity:** Liquidity is central to how LumanagiSwap is going to work. Users can add liquidity for any token pair by staking both through the liquidity page.
- 3. Community governance:** LMNG holders will be able to express their opinion and vote on the future of LumanagiSwap with using their LMNG tokens.
- 4. Forum:** LumanagiSwap believes that the community needs to engage and be interactive to help everyone's growth in the crypto space. The swap will provide a new forum on the webapp to help the user communicate efficiently and safely.
- 5. Referral airdrop:** To reward not just the existing users but newcomers LMNG will be holding referral airdrop events for users who wants to share Lumanagi with their friends.
- 6. Portfolios:** Lumanagi is on the mission to make investing easier and faster. Defi is becoming the biggest sector within crypto, new tokens popping up daily with good returns. Our team would like provide a unique feature where users are able to auto invest and auto buy tokens to create their portfolio based on market segments.
- 7. NFT auction house:** The growing NFT market provides opportunity to creators and projects to build their community faster and bigger, also helps investors to earn extra income with flipping NFTs. Lumanagi would like to create a new NFT auction house with safety steps to ensure the auction will be rightful and to theft can happen.
- 8. Prediction games:** We have seen a successful prediction game designed and developed by pancakeswap but we move forward with the idea. We bring SOL,AVAX, BTC and BNB to the gaming.
- 9. Multi languages:** Our swap will be supporting multiple languages across the globe to help those who are not exercising the English language.

# WHY ARE WE DIFFERENT?

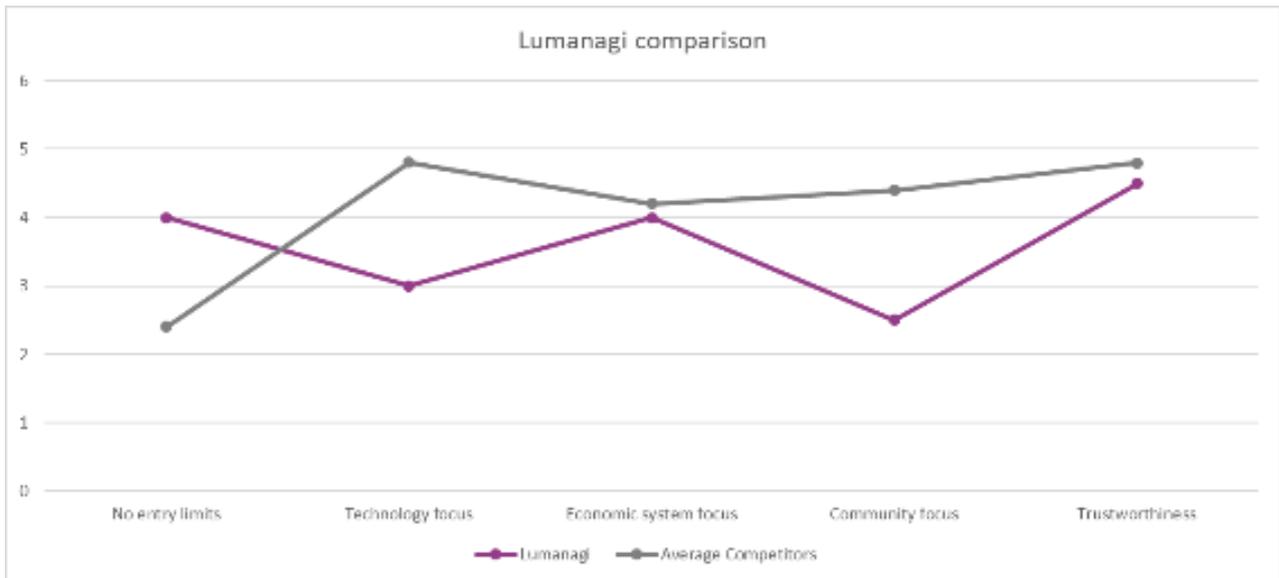

Lumanagi is going to firstly focus on the Eastern-European region and popularize the crypto-market among its nations while creating value by building bridges between yet not connected tokens this way contributing to the crypto tech world. Also, its governance token is going to allow the holders to vote concerning the vital decisions of the swap.

We have looked up the 4 biggest market leaders in the crypto swap business: DYDX, UNISWAP V3, PackaceSwap, SpookySwap. We investigated different aspects of their business models and we found that they are applying two main strategies: Technology focused (improved exchange algorithms), Jack of all trades (more options for investors/ traders). Therefore we should focus on a different aspect that enables access to those who hadn't got the chance to enter the crypto market due to its terms and workflow's mystification. We would like to focus more on the rare token's bridge buildings (besides the main ones) and simplification of the wallet creation process and the usage of the platform as much as possible. We would also love to provide tutorial materials that explain the usage of the platform in a straight right to the point way.

To ensure our investors and users that LMNG and the Lumanagi project will be secure and insured. The founders will be buying physical gold and reserve it for unforeseen situations that may arise to support the project and compensate the users.

On the following graph you can see the comparison between Lumanagi and the leading swaps concerning the following factors on a 5 Likert scale:

- No entry limits (how easy to start using the platform)
- Technology focus (how many fintech functions are available)
- Economic system focus (economic fundamentals respected)
- Community focus (trading volume on the platform)
- Trustworthiness (audited etc.)

# ADVANCED COMMUNITY FOCUS

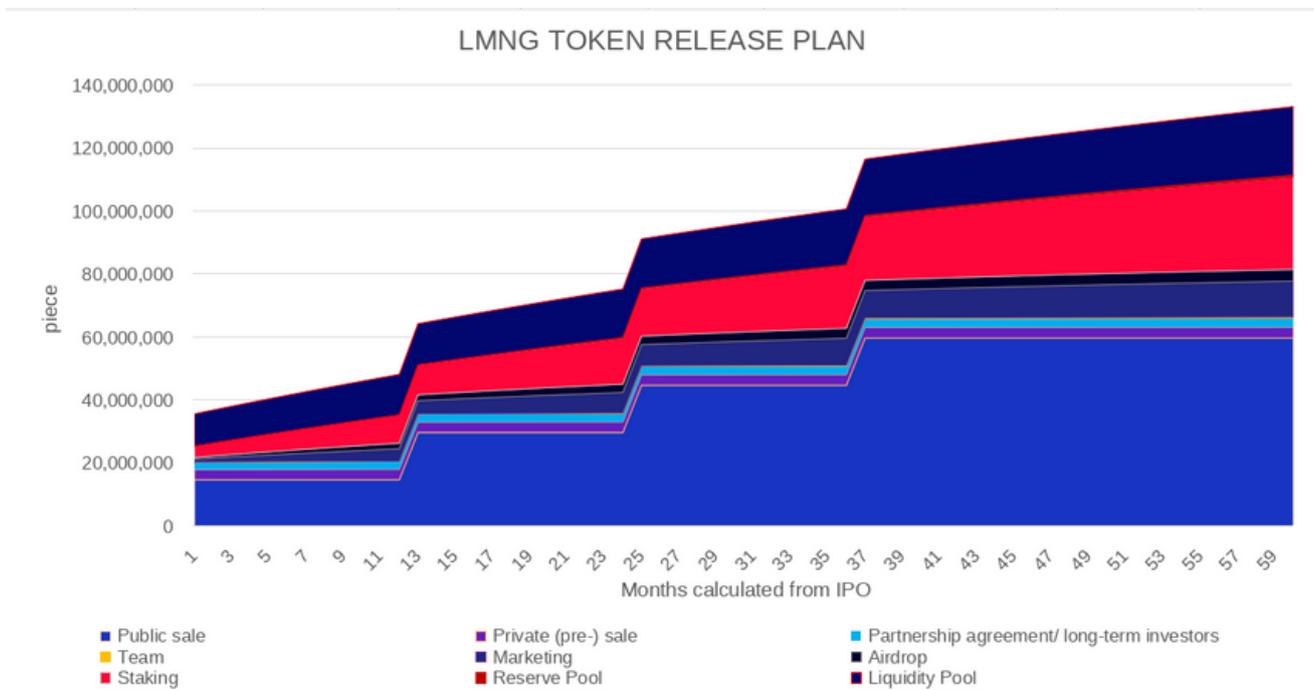

By creating Lumanagi we would like to create a DEX (Decentralized/Distributed Exchange) where the exchange's token holders are going to be able to practice their voting rights to govern its system. We would like to create a multi-layered decision supporting system where the holders could facilitate ideas then raise the most fascinating ideas which could serve as the basis of the token holders' final vote. This way we could truly let the people participate the power over the platform and add value to its development. To distribute the tokens among people as equally as possible we need to raise awareness about our swap platform and draw in as many holders as possible. This task is going to be solved by Lumanagi's top crypto marketing team and their Twitter bots. Our purpose is to inform and reward those who join our community, not to spam with advertisements. Therefore airdrops might be coming in the form of incentives to fasten up the adaptation of the platform.

Also, we have recognized that one of the biggest obstacles in the way of the crypto system's adaptation is the initial hardness to get by the jargon of the industry and the not-so-simplified toolkit usage. To tackle this issue we intend to make as easy the wallet creation and main functions of the swap as possible. We are also planning to create straight-to-the-point tutorial materials in the form of texts and videos for the platform's usage.

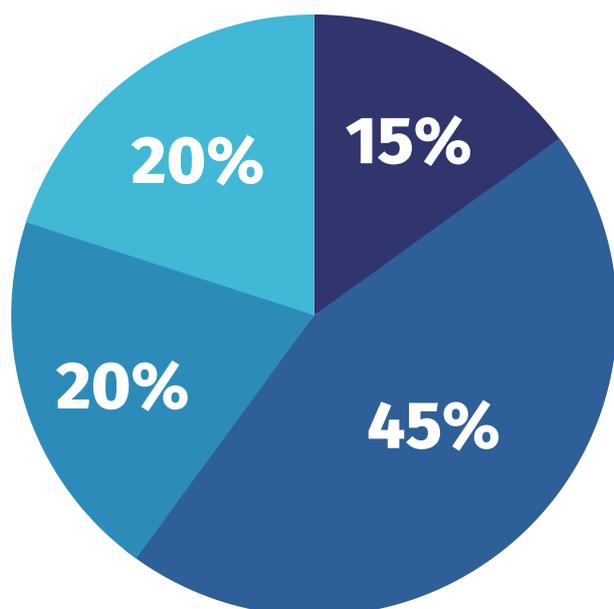

# TOKEN ECONOMICS

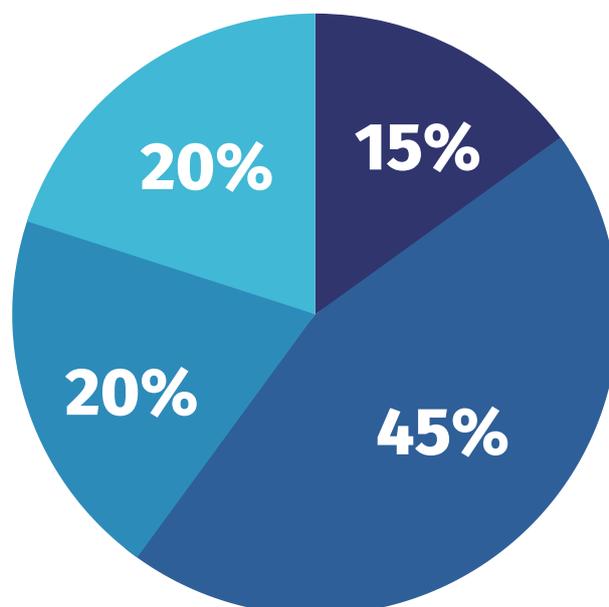

The maximum supply of the Lumanagi (LMNG) token is Our token release plan considers two types of mechanisms. Firstly, in the case of Public sale, Private (pre-) sale, Partnerships agreement/ long-term investors we are going to apply a bulk release plan. Secondly, in the case of Team and advisors, Staking Pool, Reserve Pool, Rewards/ Airdrops we would like to apply a monthly dropping scheme. We would like to also make sure that our clients trust us, therefore we are planning a one-year lagged release plan for the Private (pre-) sale, Team and Advisors, Reserve Pool categories. Also, we would like to highlight that we are not planning to release the Liquidity Pool's content due to having other aims for this amount like providing liquidity for the swap.

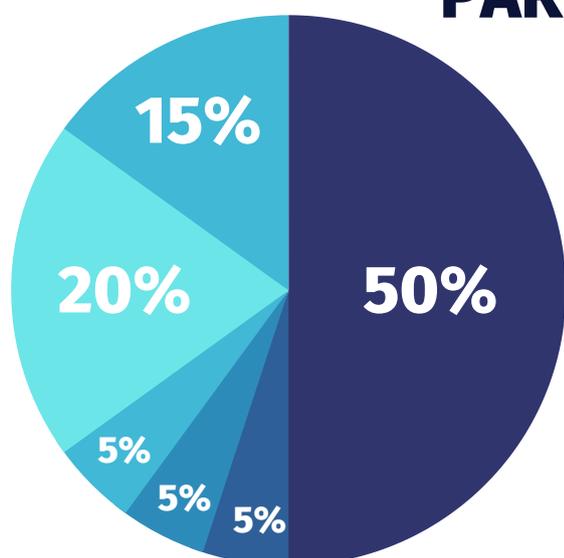

## PRIVATE SALE

## PUBLIC SALE

## PARTNERSHIP AGREEMENT

# SIMPLIFIED ROADMAP

The goals for 2022/2023 shows the Lumanagi company's roadmap. It takes into account multiple defi projects, the DEX. The plans are divided into three main focuses: community, economy, and technology.

In the third quarter of 2022, we plan to do the LMNG IDO (Lumanagi – governance token). Then in the next quarters, we would like to develop the necessary crypto and defi software technologies for our first DEX product.

## Q2 2022:

---

Growing the community (Telegram, Discord, Twitter)

LMNG Token Smart Contract on BSC

Hiring new team members (Marketing, development)

Website launch in English/Hungarian

Private sale

## Q3 2022:

---

LMNG Token IDO

Listing on major exchange

Starting of DEX development

Lottery – DEX

NFT Auction house

Analytics

Prediction Games – BNB,Matic

Token Investment Portfolio

Trading competitions

New website development

Hiring new team members (Development, Defi)

Growing community (Twitter, LinkedIn)

## Q4 2022:

---

Start Bridge Development Avax -BSC, Avax – SOL

Launch LMNG on Avax

Launch LMNG on Solana

Voting platform

Office set up in Hungary for team

Listing on one major Exchange

DEX release

## Q1 2023:

---

Launchpad starts of Development

Deposit/Lending feature

Charitable raffles

Launch LMNG on Polygon

Bridge building between Sol-Polygon

Listing on one major CEX

LUMANAGI

# PARTNERS & COMMUNITY

Be part of the community, which widespread its whispers and awaits you! Your role is owned by your decisions!
